But Local Footballists Tell Somerse To Go and Earn a Rep.

The Somerset football team, which has been defeated six straight times by the Stanford school eleven, jumps into print in the Journal there with this effasion:

They're Afraid.

"At last boastful Stanford High School has refused to battle with our noble warriors of the gridiron! After defeating Somerset six times in succession and hearing that we have a somewhat better team than ever before, they seem to be afraid of suffering defeat at the hands of Somerset's husky players. They refused on the grounds that they have not the team they possessed before and that they could not play first-class high schools this year, owing to the loss of several of their players. By press reports we note that they defeated Lancas-Campaign Chairman W. L. Me-carty, who has so efficiently and "not having a team?" Surely not. aggressively managed the fight for There is and can be but one way of Woodrow Wilson in Lincoln county looking at this refusal and that is they are "skeered of us." R-C-H "Twenty-Five" \$900

You Can Pay More---But What More Will You Get?

We ask your investigation of the R-C-H on two plain statements: First, that no car at any price is more staunchly or sturdily built; second, that if you do not buy an R-C-H you will not get as great a value anywhere else.

A CAR THAT IS CHEAP ONLY IN PRICE

The R-C-H marks the biggest re-ad-justment of the motorcar values in years. But the price is made possible by two things—quantity production, and a systemitization of cost and factory problems such as we do not think the industry has ever before experienced. Our motto is: "Spend every dollar necessary for quality, but don't waste a cent." And it's wonderful what a difference the close application of that principle makes in the price of the car.

LEFT-SIDE DRIVE---CENTER CONTROL

Any other than a left-side drive is an absurdity under North American road rules. It is a wonder that American motorists tolerated a right-side drive for so many years; a greater wonder that manufacturers retained it.

The drive of the R-C-H is left-side; the control is center lever-out of the way, yet convenient to the operator's right hand.

Greater accessibility; greater interchangeability due to the extensive use of drop forgings, ideal spring arrangement; perfect braking system—there are dozens of R-C-H features that must be seen to be appreciated.

Let us show them to you.
